DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4 and 33-41 are allowed.
2. Regarding claim 1, the prior art does not teach or make obvious the use of
 - Adjusting a control parameter of the proportional calculator in response to the detected optical input power, said control parameter being a proportional constant by which said error signal is multiplied to form said proportional control signal, said proportional constant being represented by a function of the input power as a result of the adjusting the control parameter in response to the detected signal power

within the context of claim 1 taken as a whole.

3. Regarding claim 33, the prior art does not teach or make obvious the use of
 - Means for adjusting a control parameter of the proportional calculator in response to the detected optical input power, said control parameter being a proportional constant by which said error signal is multiplied to form said proportional control signal, said proportional constant being represented by a function of the input power as a result of the adjusting the control parameter in response to the detected signal power

within the context of claim 33 taken as a whole.

4. Regarding claim 35, the prior art does not teach or make obvious the use of
 - A gain control adjusted configured to adjust a control parameter of the proportional calculator in response to the detected optical input power, said

control parameter being a proportional constant by which said error signal is multiplied to form said proportional control signal, said proportional constant being represented by a function of the input power as a result of the adjusting the control parameter in response to the detected signal power

within the context of claim 35 taken as a whole.

Conclusion

5. The prior art which is cited but not relied upon is considered pertinent to applicant's disclosure.
